9	Waste Products				
9.1	Amount of Hazardous Waste Manifested for Disposal		165	69	Emera companies are focused on reducing waste at its source and minimizing the amount of non-hazardous and hazardous waste that is produced and in need of disposal. All waste is managed and disposed of in accordance with applicable regulations and at approved facilities. As Emera's Sustainability Program continues to improve, efforts are being made to improve data collection related to waste metrics. In 2020, Emera companies disposed of approximately 69 tonnes of solid hazardous waste and 5,300 litres of liquid hazardous waste. This included approximately 0.05 tonnes of solid PCB and 1,459 litres of liquid PCB waste. Several of our affiliates did not dispose of PCB waste in 2020 due to restrictions in bringing external disposal contractors in from other regions. Note: Last year we reported that 5,600 litres of PCB waste was disposed. This was in error. Approximately 32,000 litres of liquid hazardous waste disposed in 2019 was PCB waste.
9.2	Percent of Coal Combustion Products Beneficially Used		18%	17%	In 2020, Emera companies produced a total of 646,593 tonnes of coal ash, of which approximately 17 per cent (111,546 tonnes) was repurposed for other industrial uses.
