

# TCFD Alignment

Decarbonization has been central to our strategy and has been driving growth and innovation for more than 15 years. Our Climate Commitment builds on our strong track record with our vision to achieve net-zero CO<sub>2</sub> emissions by 2050. We've set clear carbon reduction goals along the way. We have also been assessing physical climate risks and determining both short- and long-term business impacts. Emera is aligned with the [Task Force on Climate-related Financial Disclosures \(TCFD\) Recommendations](#) as one way to track the disclosure of our commitment and our ongoing efforts to address climate change.
