Net-Zero Roadmap

Emera continues to be responsive to government-mandated climate targets and customer interests within the framework of an affordable and reliable energy system.

capacity being available from the NSIESO

The net-zero planning roadmap is a summary highlighting recently completed and in-progress projects and planned investments outlined in NSP's Path to 2030 (2024 Update)¹² and integrated resource plans, and TEC's ten-year site plans. To proceed, projects contemplated for the future must prove to be cost effective investments that support customer reliability and affordability priorities.

Note that some projects are not in Emera's direct control (i.e. independent power producers).

1 Encompasses provincial procurement programs and other

independent power purchase agreements.

2 A total of two 150 MW units.

5 A total of three 150 MW units 4 Timing of coal unit retirements is contingent on replacement 6 Actual size of additional battery and wind capacity and timing of

battery/wind capacity additions will be determined by the NSIESO

- 7 Capacity conversion
- 8 With respect to NSP, new projects would be procured by the NSIESO
- 9 Emera's Net-Zero Roadmap is focused on NSP and TEC and captures
- 93 per cent of our Scope 1 CO₂ emissions

12 NSIESO will be taking over responsibility for energy resource planning from NSP in the next few years.
